Inputs for use in Organic Agriculture

A reference player in organic certification in France and internationally since 1991, Ecocert offers two services to evaluate the compliance of your inputs that are suitable for organic farming.

Evaluation of your products for use in Organic Farming

Choose Ecocert

Facilitate the conformity assessment of your inputs according to current organic regulations: EU, NOP, JAS or local* with Ecocert experts.

* If you are interested in other national or local regulations, please let us know and we will assess the feasibility of your request with our subsidiaries

European Organic Farming Regulation (EU)

National Organic Program (NOP)

Japanese Agricultural Standard (JAS)

2 levels of guarantee for your agricultural inputs

Ask to have your inputs independently and impartially verified by Ecocert:

Process in 6 key steps:

Documentary Review  Attestation 

1	Commitment	✓	✓
2	Documentary validation to check the conformity of your products	✓	✓
3	On-site audit		✓
4	Referencing of products on our website www.inputs.bio	✓	✓
5	Commercial attestation and use of the « Approved by Ecocert Inputs » logo on your labels and other commercial documents 		✓
6	Use of the mention «Product suitable for use in Organic Agriculture in accordance with the EU and/or NOP and/or JAS regulations»	✓	✓

Promote your input evaluation by choosing the Input Attestation, providing additional guarantees of traceability and quality as well as visibility.

Which inputs are concerned?

All the products involved in the manufacturing process of a certified organic product, but which are not themselves subject to certification.

- Fertilizers
- Crop protection products
- Cleaning and disinfection products
- Oenological inputs
- Additives and auxiliaries, mulch film etc.
